## Description

Crumbling World is a dark fantasy action RPG that was originally inspired by classic games like Diablo and Prince of Persia. With engaging low-poly graphics, Crumbling World combines the best aspects of action and role-playing games in a unique world that is continuously changing. Set in a medieval world where the end is near, players must navigate a steadily crumbling game environment, all while driving back those lost souls who have been taken by the Evil Forces.

As a story-based game, Crumbling World allows players to take control of seven unique characters across five distinct classes, with the goal of saving the World from 40+ different enemies, including Unique Enemies and Boss Enemies, in mind. Successful completion of the game requires the completion of numerous quests and missions, which are made all the more deadly thanks to the game's real-time combat mechanics. Better yet, over 30 procedurally generated levels spread across five Regions allow for never-ending fights against hundreds of enemies with your favorite combat class to always feel like a fresh and new experience.

Best of all, dedicated fans will enjoy the ability to upgrade their character's skills and abilities, which means that each player's combat style will be reflected in their character's attributes over time. With the survival of the world on the line, Crumbling World provides an engaging story, full of unexpected twists and surprises, that is sure to engage and delight players for hours on end. The survival of the World is in your hands, and it's up to you to figure out how to save humanity.
